You can find more information and change your preferences here Doubles plus 1 is a strategy used to add two consecutive numbers that is, when they are next to each other. We simply add the smaller number twice or double it and then, add 1 to it, to get the final result. Here, for example, consecutive numbers 8 and 9 have been added using the doubles plus one strategy. Here are more examples of the double plus 1 strategy. Fun Facts- Doubles plus 1 and doubles minus 1 are also called near doubles strategies. Let's sing! Let's add consecutive soap bubbles.Adding five and six; there's no trouble!Just make the smaller number double,Then add 1 to the double of the bubbles. Let's do it! Have fun with your child by asking them to find the doubles of numbers you say and then use double plus 1 and doubles minus 1 strategies to find the sum of consecutive numbers between 1 and 20.
